

Clamping members, lever- and spring-operated, on jig.....	159
Clamping ring, floating, on grinding fixture.....	275
Clamping slide, cam-operated, on drill jig.....	154
Clamping, wedges or taper gibs for.....	130
Clamps, different types applied to jigs.....	136
floating, and locator, applied to milling fixture.....	265
floating, and taper locating plug for chucking fixture.....	267
floating, applied to piston drill jig.....	260
floating, for piston chuck.....	272
for jigs.....	28
for jigs, <i>types</i> of.....	n o
multiple, arranged to equalize pressure.....	293
quick releasing.....	142
two-point, attached to jig cover.....	128
which exert combined inward and downward pressure.....	290
Closed or box jigs, design of.....	45
examples of.....	56
Clutches, indexing fixture for milling.....	220
Clutch gear, indexing fixture for.....	310
Collar-head screws, dimensions, table.....	116
Combination drill and boring jig.....	209
Continuous milling fixture.....	223
Cross-drilling pistons, jigs for.....	179
Cup and cone locating points for jigs.....	94
Cylinder flange jig.....	13
Cylinder liner, recoil, profile milling fixture for.....	233
Deep-hole drilling in studs, jig for.....	171
Defects common to jig design.....	107
Design of jigs, application of clamps.....	136
boring.....	203
closed or box.....	45
common defects.....	107
details of.....	*9
general remarks.....	9
open type.....	25
summary of principles.....	10
Dial plates, power press, jig for drilling.....	193
Drawings for jigs.....	21
Drill and boring jig, combination.....	209
Drill bushings, driving fit allowances, table.....	88
removable table.....	?6
stationary, table of dimensions.....	7*
types of.....	7i
Drilling and reaming jig. ,.....	3°9
Drilling jig, for use in vise.....	170
Drill jig, designed for rapid indexing.....	163
equipped with duplex clamping device.....	194
